Muhammad Abdullah Sultan

Computer Engineer | Networking & Machine Learning Specialist

abdullah.s1045g@gmail.com www.linkedin.com/in/mabdullah-sultan +92 3136848010

Professional Summary

Computer Engineering graduate with dual specialization in ML model development and secure network architecture. Delivered 90%+ accurate prediction systems and led to full-stack features in production environments. Experienced with Arduino-based robotics, REST APIs, and cross-platform cloud deployment.

Education

Bachelor of Science in Computer Engineering *Nov 2021 – May 2025*
University of Engineering and Technology, Taxila

Relevant Coursework

- Operating System
- Computer Network
- Data Structure
- Database Management
- Machine Learning
- Network Security
- Data Warehouse and Mining

Skills

Programming: Python, JavaScript, SQL, HTML/CSS

Machine Learning: TensorFlow, Scikit-learn, Model Deployment, Data Preprocessing, Feature Engineering

Networking: TCP/IP, Wireshark, Routing Protocols, VPN, DNS, Subnetting, Cryptography, Network Security

Embedded System and Robotics: Arduino, IR/Ultrasonic Sensors, Gesture recognition, Assembly

Tools & Platforms: Git, Docker, Flask, Linux, Jupyter Notebook

Databases: MongoDB, SQLite, MySQL

Experience

Python Programming Intern *Jun 2024 – Aug 2024*
A&D Tech Innovations – Remote
- Developed and launched 3+ desktop apps using Python and Tkinter, improving task efficiency by 40%
- Used OOP and modular design for reusability, reducing development time by 25%
- Collaborated with a 4-member Agile team, completing sprint-based development cycles

Backend Developer Intern *Mar 2024 – Jun 2024*
Neuron Tech (AI Startup – Remote)
- Developed full-stack features using React, Node.js, Firebase, and OpenAI APIs
- Secured app workflows with Firebase Auth & Firestore
- Contributed to team sprints, testing, and LLM data pipelines

Projects

Sleep Stage Detection Using EEG Signals
- Achieved 87% accuracy in classifying sleep phases using TensorFlow and Scikit-learn
- Processed 5,000+ EEG samples; implemented optimized signal processing pipeline

Plant Disease Detection App – FYP
- Developed ML-integrated Flutter app with 6 CNN models and real-time disease detection (90%+ accuracy)
- Deployed models via Flask REST APIs with Docker for scalable backend processing
- Enhanced yield prediction accuracy by 10% over traditional methods, providing farmers with actionable insights to optimize crop production.

Multifunctional Robotic Car (Arduino Uno)
- Designed robotic car with obstacle avoidance, line-following, gesture recognition algorithms and Arduino programming
- Integrated ultrasonic sensors, IR sensors, and an accelerometer module for responsive

Leadership and Activities

Marketing Head – AI R&D, UET Taxila *Mar 2024 – May 2025*

- Led 10+ tech events; boosted campus participation by 40%
- Doubled online reach via strategic social campaigns and collaborative initiatives

Management Head – TRAC, UET Taxila *May 2023 – June 2024*

- Organized 4 successful technical events and training sessions on GitHub, AI/ML, robotics, and embedded systems
- Managed cross-functional teams to streamline logistics, outreach, and post-event follow-up, leading to an increase in participation

Awards and Certifications

-FYP 5th position in OPEN HOUSE 2025 – **CPED**

- Cisco Networking Basics & Cybersecurity - **NetAcad**

- Machine Learning & AI - **Educative**

- Graphic Designing – **Digiskills**

- Google IT Support Professional (In Progress)

Languages

English (Fluent) Urdu (Native)
