PROFESSIONAL SUMMARY

Software Engineer and Full Stack MERN Developer with hands-on experience building scalable, responsive, and production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Proficient in RESTful API design, JWT authentication, database architecture, AI-powered application development, and modern frontend engineering. Experienced delivering maintainable, high-performance software solutions and collaborating within Agile/Scrum teams.

EDUCATION

Bachelor of Science in Software Engineering

PMAS-Arid Agriculture University | Rawalpindi, Pakistan

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Python
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend:	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
Databases:	MongoDB, MongoDB Atlas, SQLite, Oracle
Tools:	Git, GitHub, Docker, Postman, VS Code, Vercel, Render
Practices:	Agile/Scrum, CI/CD, API Integration, Real-Time Systems, AI Integration

PROFESSIONAL EXPERIENCE

Full Stack Developer | ABDANIX Solutions Islamabad, Pakistan Dec 2025 – May 2026

- Designed and developed scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), contributing to production-ready deployments.
- Built and secured RESTful APIs with JWT-based authentication, role-based access control, and input validation to protect user data.
- Integrated frontend React.js interfaces with backend services and MongoDB databases, ensuring seamless data flow and consistent UX.
- Implemented API validation, authorization middleware, and secure user management flows across multiple application modules.

PROJECTS

SafarBot – AI-Powered Booking Platform — React.js, Node.js, Express.js, MongoDB | safar-bot.vercel.app

- Built an AI-powered transport booking platform with intelligent automation, reducing manual booking steps through voice-enabled interaction and real-time workflow processing.
- Engineered secure REST APIs and authentication systems with JWT and session management to support multi-user concurrent access.

Onyx Closings – Real Estate Platform — React.js, Node.js, MongoDB | www.onyxclosings.com

- Developed responsive frontend and backend features for a real estate platform, including property listings, inquiry management, and agent-client communication workflows.
- Integrated dynamic database queries and optimised API response times, improving overall application performance and user experience across devices.

Umii Footwear – Online Shoe Store — React.js, Node.js, Express.js, MongoDB | umii-footwear.vercel.app

- Developed a fully functional e-commerce web application for footwear, featuring product listings, shopping cart, and a responsive design optimised for all devices.
- Implemented backend REST APIs with Express.js and MongoDB for product management, cart state, and order processing workflows.
